The main goal of the program is to bring together professional women leaders from different professions to share their knowledge and experience with young women starting their careers with similar interests and a desire to be successful in their fields. This will help to create opportunities for these women to improve their career path in order to achieve positive change and to set a sound basis for future long-term cooperation. Model of mentoring has been widely promoted internationally and successfully implemented in several countries. Taking into account our environment and social conditions, the model has been slightly adapted to the target group in the Republic of Serbia.
